With the exception of Related Party Issues, the granting of Tranche 1 Options and Tranche 2 Options are not subject to any Shareholders' approval, as the Company will proceed with the grants if Shareholders do not approve those grants but if the Company nevertheless has the capacity to do so under ASX Listing Rule 7.1.

4.3 Use of proceeds raised from the exercise of Options

As noted in Section 4.2, the granting and exercise of all of the Options offered under this Prospectus would involve the Company raising a total of approximately \$3,893,024.

Subject to when the Options are exercised, the Company intends to use the proceeds of the exercise of the Options to accelerate exploration on the Company's Ngami and Okavango projects in the Kalahari Copper Belt in Botswana and also the High Purity Quartz project in Western Australia or, otherwise, for general working capital purposes.

The stated basis of preparation for the Historical Financial Information is in accordance with the recognition and measurement principles of the Australian Accounting Standards.

The stated basis of preparation for the Pro Forma Historical Financial Information is in a manner consistent with the recognition and measurement principles of the Australian Accounting Standards applied to the Historical Financial Information and the events or transactions to which the pro forma adjustments relate, as described in Section 4.6, as if those events or transactions had occurred as at 30 June 2024.

4.6 **Pro-forma adjustments to consolidated balance sheet**

The Pro Forma Historical Financial Information has been derived from the Historical Financial Information and has been prepared on the basis that the Placement occurred as at 30 June 2024 and assumes an allotment of 71,449,478 Shares at the price of \$0.065 to raise gross proceeds of \$4,644,216 (before costs).

4.7 **Effect on control**

The Offers will not have a material impact on the control of the Company (as defined in section 50AA of the Corporations Act).

The maximum number of Options proposed to be granted under the Offers is 39,724,739 Options.

Assuming that all Shares are issued under the Placement, a total of 439,639,953 Shares will be on issue and the Options granted will represent 9.04% of the total number of Shares on issue at the time of granting of the Options.

4.8 **Substantial holders**

Based on the Company's share register as at 12 February 2025, the persons who (together with their associates) have a relevant interest in 5% or more of the Company's securities are set out below:

Shareholder	Shares	%
Strata Investment Holdings PLC*	83,841,246	19.62%

*Subject to Shareholders' approval, Strata Investment Holdings PLC is proposing to acquire a further 3,846,154 Shares under Tranche 2 Placement, resulting in a total of 87,687,400 Shares held, representing a total relevant interest in 19.95% of the Company's securities (assuming all shares under Placement Tranche 2 are issued).

4.9 Effect on Capital Structure

Assuming the requisite Shareholder approvals at the EGM and the subsequent completion of the issue of Shares and Options under the Offers, the capital structure of the Company will comprise:

Shares	
Shares on issue at the date of this Prospectus	427,332,259
Shares to be issued under the Placement Tranche 2	12,307,694
Shares on issue at completion of the Offers	439,639,953

Options to be granted under the Offers	39,724,739	38.13%
Options granted at completion of the Offers	104,186,286	100.00%

4.10 Dilution

The granting of Options will not result in any dilution to Shareholders, but the issue of Shares upon exercise of Options will result in dilution of Shareholders (other than the Shareholder who exercised the Options).

Assuming all Shares under Placement Tranche 2 will be issued, the granting and subsequent exercise of the Options offered under the Offers will increase the 439,639,953 Shares on issue on completion of the Placement to 479,364,692 Shares (an increase of 9.04%, assuming no other Options are exercised).

5. Rights and Liabilities attaching to Options and Shares

5.1 Options

Each option (**Option**) granted by the Company entitles its holder to subscribe for one fully paid ordinary share in the capital of the Company (**Share**) on the following terms and conditions:

- (a) The Options are exercisable at \$0.098 each, at any time after their issue up to 5pm Sydney time 18 months from the date of their issue, but not thereafter (**Option Exercise Period**). Each Option will automatically lapse if not exercised prior to expiry of the Option Exercise Period.
- (b) Each Option entitles the holder to subscribe for, and be issued with, one Share.
- (c) The Company will not apply for quotation of the Options on ASX. The Company will apply for quotation of the Shares issued on exercise of the Options.
- (d) The Company will instruct the Share Registry to give or cause to be given to each Option holder a certificate or holding statement stating:
 - (i) the number of Options granted to the Option holder;
 - (ii) the exercise price of the Options; and
 - (iii) the date of granting of the Options and the Option Exercise Period.
- (e) The Company, through its Share Registry, will maintain a register of holders of Options in accordance with section 168(1)(b) of the Corporations Act.
- (f) The Options are freely transferable, subject to registration of the transfer by the Company.
- (g) For such time as the Company is listed, the official listing rules of ASX (**Listing Rules**) will apply to the Options.
- (h) Options do not carry any dividend entitlement until they are exercised. Subject to the Constitution, Shares issued on exercise of Options will rank equally with all other issued Shares from the date they are issued by the Company.
- (i) An Option holder is not entitled to participate in any new issue of securities to existing shareholders of the Company (**Shareholders**) unless the Option holder has exercised its Options before the record date for determining entitlements to the new issue of securities and participates as a result of holding Shares.
- (j) If the Company is listed on ASX, the Company must give the Option holder, if required to do so by the Listing Rules, notice of:
 - (i) the proposed terms of the issue or offer proposed under paragraph 5.1(i); and

- (ii) the right to exercise the Option holder's Options under paragraph 5.1(i).
- (k) If the Company makes a bonus issue of Shares or other securities to Shareholders (except an issue in lieu of dividends or by way of dividend reinvestment) and no Share has been issued in respect of an Option before the record date for determining entitlements to the issue, then the number of underlying Shares over which the Option is exercisable is increased by the number of Shares which the Option holder would have received if the Option holder had exercised the Option before the record date for determining entitlements to the issue, in accordance with the Listing Rules.
- (l) If the Company makes a pro rata issue of Shares (except a bonus issue) to existing Shareholders (except an issue in lieu or in satisfaction of dividends or by way of dividend reinvestment) and no Share has been issued in respect of the Option before the record date for determining entitlements to the issue, the Company may elect to reduce the exercise price of each Option in accordance with the Listing Rules.
- (m) If there is a reorganisation (including consolidation, sub-division, reduction or return) of the share capital of the Company, then the rights of the Option holder (including the number of Options to which each Option holder is entitled and the exercise price) is changed to the extent necessary to comply with the Listing Rules applying to a reorganisation of capital at the time of the reorganisation.
- (n) Any calculations or adjustments which are required to be made under these Option Terms of Issue will be made by the Board and will, in the absence of manifest error, be final and conclusive and binding on the Company and the Option holder.
- (o) The Company must within a reasonable period give to each Option holder notice of any change under paragraphs 5.1(k) to 5.1(m) (inclusive) to the exercise price of any Options held by an Option holder or the number of Shares for which the Option holder is entitled to subscribe on exercise of the Options.
- (p) When exercising Options, an Option holder must give the Company or its share registry a Notice of Exercise of Options Form (in a form approved by the Company, with the parties acknowledging that the Notice of Exercise of Options Form may be delivered by the Option holder to the Company by email), together with payment of the exercise monies payable to the Company in connection with the Options being exercised and, if one was issued, the Option holder certificate.
- (q) The Options are exercisable on any day other than a Saturday, Sunday public holiday or any other day that ASX declares is not a business day (**Business Day**) during the Option Exercise Period.
- (r) An Option holder must only exercise a minimum of 50,000 Options, and thereafter in multiples of 50,000, unless an Option holder exercises all of its Options.
- (s) If an Option holder exercises less than the total number of its Options, the Company will instruct the Share Registry to issue the Option holder a new

holding statement for the remaining number of Options held by the Option holder.

- (t) Options will be deemed to be exercised on the date that the Notice of Exercise of Option Form is received by the Company in accordance with paragraphs 5.1(p) and 5.1(q). The Company shall within 10 Business Days after the receipt of such Notice and cleared funds, issue Shares in respect of the Options exercised and dispatch a holding statement to the holder in respect of the Shares so issued.
- (u) The Company will apply to ASX for official quotation of the Shares issued on exercise of the Options within two Business Days of the date of issue of such Shares.
- (v) If required by the Listing Rules to do so, the Company will advise an Option holder before the impending expiry of their Options and will advise the due date for payment, the amount of money payable on exercise, the consequences of non-payment and such other details as the Listing Rules then prescribe, so as to enable holders to determine whether or not to exercise their Options during the Option Exercise Period.
- (w) These Option Terms of Issue and the rights and obligations of Option holders are governed by the laws of New South Wales. Each Option holder irrevocably and unconditionally submits to the non-exclusive jurisdiction of the courts of New South Wales and the Federal Court of Australia and any courts that may hear appeals from those courts about any proceedings in connection with these Options.

5.2 Shares

A summary of the key rights attaching to the Shares is set out below. The provisions of the Constitution relating to the rights attaching to the Shares must be read subject to the Corporations Act, the ASX Listing Rules, ASX Settlement Operating Rules and other applicable laws. This summary is not intended to be exhaustive and does not constitute a definitive statement of the rights, liabilities and restrictions attaching to the Shares.

(a) General meetings

Pursuant to the Company's Constitution, any person entered on the Company's register of members (each a **Member**), is entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company. Members are entitled to receive notice of and to attend general meetings of the Company and to receive all notices, financial reports and other documents required to be sent to Shareholders under the Constitution, the Corporations Act or the ASX Listing Rules. The notice must state the general nature of business and any other matters required by the constitution, the Corporations Act or the ASX Listing Rules.

Members may requisition meetings in accordance with the Corporations Act.

(b) **Voting rights**

Subject to the Constitution, Corporations Act and other relevant laws, and to any rights or restrictions attaching to any class of shares, the Shareholders may vote at meetings of shareholders as follows:

- (i) on a show of hands, each shareholder has one vote; and
- (ii) on a poll, each shareholder has one vote for each fully paid Share, and for each partly paid Share, a Shareholder will have a fraction of a vote equivalent to the proportion that the amount paid on the Share bears to the total issue price of that Share.

A resolution put to the vote at a meeting of Shareholders must be decided on a show of hands unless a poll is demanded.

A Shareholder is not entitled to vote unless all calls due and payable in respect of their Shares have been paid.

If a Share is held jointly, and more than one Shareholder votes in respect of that Share, then only the vote of the Shareholder whose name appears first in the register of Shareholders will count.

(c) **Dividend rights and dividend policy**

The Board may declare or pay dividends as it sees fit.

If the Board declares or determines that a dividend is payable, it may fix the amount, time for payment and method for payment. The methods for payment may include payment of cash, issue of shares and the transfer of assets.

(d) **Winding-up**

If the Company is wound up, the liquidator may, by special resolution passed by the Shareholders:

- (i) divide among the shareholders the Company's assets, whereby the liquidator will determine how to carry out the division of those assets between Shareholders; and/or
- (ii) vest all or any of the Company's assets in a trustee on trusts determined by the liquidator for the benefit of the Shareholders and other contributories.

(e) **Transfer of Shares**

Subject to the Constitution, a shareholder may transfer any or all of their shares. A person transferring any of their shares remains the holder of those shares until the Company registers the transfer and the name of the person to whom those shares are sold is recorded in the Company's register of shareholders.

The Board:

- (i) may, in their absolute discretion, decline to register a transfer of shares, in any circumstances permitted by the Corporations Act, ASX Settlement Rules or other relevant law; and
- (ii) must decline to register a transfer of shares that are Restricted Securities during the relevant period within which they are restricted from being transferred, except as permitted by the ASX Listing Rules or ASX.

The Board may suspend registration of transfers of shares in the Company at the times and for the periods they determine. The periods of suspension must not exceed 30 days in any one calendar year.

(f) **Issues of shares**

Subject to the Constitution, the Corporations Act, ASX Listing Rules and any special rights conferred on the holders of any existing shares or class of shares:

- (i) shares in the Company may be issued or otherwise disposed of by the Board in the manner that the Board thinks fit; and
- (ii) any shares may be issued with preferred, deferred or other special rights or restrictions and on terms and conditions as the Board determines.

(g) **Variation of rights**

Subject to the ASX Listing Rules, if at any time the share capital of the Company is divided into different classes of shares, the rights that are attached to the shares in a class of shares may, unless their terms of issue state otherwise, be varied or cancelled:

- (i) with the written consent of holders of shares in that class, who hold at least 75% of the votes in that class; or
- (ii) with the sanction of a special resolution passed at a meeting of holders of shares in that class.

(h) **Application of ASX Listing Rules**

If the ASX Listing Rules prohibit an act being done, then the act must not be done. Nothing in the Constitution prevents an act being done that the ASX Listing Rules require to be done. If the ASX Listing Rules require an act to be

done or not to be done, authority is given for that act to be done or not to be done (as the case may be). If the ASX Listing Rules require a constitution to contain a provision or not to contain a provision, the Constitution is deemed to contain that provision or not to contain that provision (as the case may be). If a provision of the Constitution is or becomes inconsistent with the ASX Listing Rules, the Constitution is deemed not to contain that provision to the extent of that inconsistency.

6. Risk Factors

The business activities of the Company are subject to risks and there are many risks which may impact on the Company's future performance. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but many are outside of the control of the Company and cannot be mitigated. There are also general risks associated with any investment. Investors should consider all of these risks before they make a decision whether or not to acquire, and exercise, Options.

The Options offered under this Prospectus are considered speculative. An investment in the Company is not risk free and the Directors strongly recommend that potential investors consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding to apply for Options pursuant to this Prospectus.

The principal risk factors include, but are not limited to, the following.

6.1 Company-specific risks

(a) Exploration and Development

A risk for the Company is that the proposed exploration programs may not result in exploration success. Mineral exploration, by its nature, is a high-risk endeavour and consequently, there can be no assurance that exploration of any of the Company's current and future project areas will result in discovery of an economic mineral deposit. Should a discovery be made, there is no guarantee that it will be commercially viable.

Only a small percentage of individual exploration projects result in the discovery of viable economic resources and there are still development and operational risks to overcome before a commercial mine can be established. A variety of factors, both geological and market related, can cause a technical discovery to be uneconomic.

If mineralisation is discovered, it may take several years of additional exploration and development until production is possible, during which time the economic feasibility of production may change. Substantial expenditures are required to establish proven and probable reserves through drilling and scoping studies, to determine the optimal production process and to finance and construct mining and processing facilities.

At each stage of exploration, development, construction and mine operation, various permits and authorisations are required. Applications for most permits require significant amounts of management time, and the expenditure of substantial capital for engineering, legal, environmental, social and other activities. At each stage of a project's life, delays may be encountered because of permitting difficulties. Such delays add to the overall cost of a project, and may reduce its economic feasibility. As a result of these uncertainties, there can be no assurance that any mineral exploration and development undertaken by the Company, or its subsidiaries, will result in profitable commercial production.

(b) Potential for Dilution

In the future, the Company may elect to issue Shares or other securities. While the Company will be subject to the constraints of the ASX Listing Rules regarding the issue of Shares or other securities, shareholders may be diluted as a result of such issues of Shares or other securities.

(c) Development and Acquisition Opportunities

The success of the Company will depend not only on its ability to explore and develop its existing project portfolio, but also on the Company's ability to identify, secure and develop a portfolio of high quality projects, suitable assets, additional exploration acreage and strategic industry partnerships. The Company will actively pursue and assess other new business opportunities which may take the form of direct project acquisitions, joint ventures, farm-ins, acquisition of tenements/permits and/or direct equity participation or acquisition of a company or group of companies.

There is a risk that the Company will be unable to secure such opportunities or divest non-core assets at attractive valuations on appropriate terms, thereby potentially limiting the growth of the Company. The acquisition of projects (whether completed or not) may require the payment of monies (notably as a deposit and/or exclusivity fee), after only limited due diligence or prior to the completion of comprehensive due diligence. There can be no guarantee that any proposed acquisition will be completed or be successful. If the proposed acquisition is not completed, monies advanced may not be recoverable, which may have a material adverse effect on the Company.

If the Company acquires only a limited number of projects, poor performance by one or a few of these could significantly affect the performance of the Company and thereby significantly impact the returns to investors. The integration of new projects by the Company may also be more difficult, and involve greater costs, than anticipated.

(d) Future Capital Requirements

Exploration and development costs will reduce the cash reserves of the Company. The Company has no operating revenue and is unlikely to generate any operating revenue unless and until the projects are successfully developed

and production commences. The future capital requirements of the Company will depend on many factors, including its business development activities.

In order to successfully develop the projects, and for production to commence, the Company may be dependent on the need to secure further financing in the future, in addition to the amounts raised pursuant to the Placement. The Company may then be seeking development capital through equity, debt, joint venture financing or through the sale or possible syndication of its mineral properties. Any additional equity financing may be dilutive to the Shares, may be undertaken at lower prices than the then-market price (or exercise price of the Options), or may involve restrictive covenants which limit the Company's operations and business strategy. Debt financing, if available, may also involve restrictions on financing and operating activities.

Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company, or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its activities, and this could have a material adverse effect on the Company's activities and future prospects, including delay or indefinite postponement of exploration, development or production on any or all of the Company's properties. This may even result in the tenements being subject to forfeiture, and could affect the Company's ability to continue as a going concern.

The Company may undertake additional offerings of Shares and/or securities convertible into Shares in the future. The increase in the number of Shares issued and the possibility of sales of such Shares may have a depressive effect on the price of Shares and reduce their value to investors. In addition, as a result of such additional Shares, the voting power of the Company's existing shareholders will be diluted. At present, it is impossible to determine what amounts of additional funds, if any, may be required in future.

(e) Reliance on key personnel

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on the efforts and ability of senior management, executive officers and the Directors. Investors must be willing to rely to a significant extent on the discretion and judgment of these key personnel. The loss of the services of any of these key personnel could cause a significant disruption to the Company and could have a material adverse effect on its business operations and prospects, which could result in a failure to meet business objectives. There is no assurance the Company can maintain the services of its Directors, officers or other qualified personnel required to operate its business.

(f) Major Shareholder

Subject to Shareholders' approval to be obtained in the EGM, the Company's largest Shareholder, Strata Investment Holdings Plc, is expected to beneficially own up to 19.95% of the total Shares following subscription to Tranche 2 Placement. The Shareholder will be able to exercise a degree of influence over

matters requiring shareholder approval, including election of Directors and significant corporate transactions. The concentration of ownership may have the effect of deterring or delaying any change in control of the Company, could have an impact on any potential sale of the Company or may affect the value of Shares. The major Shareholder may sell all or part of its holdings of Shares in the future. Any such sale may adversely affect the value of Shares.

(g) Other Risks Specific to the Company

The current and future operations of the Company, including exploration, appraisal and possible production activities may be affected by a range of factors, including:

- (i) geological conditions;
- (ii) alterations to programs and budgets;
- (iii) unanticipated operational and technical difficulties encountered in geophysical survey, drilling and production activities;
- (iv) mechanical failure of operating plant and equipment, adverse weather conditions, industrial and environmental accidents, industrial disputes and force majeure;
- (v) unavailability of aircraft or drilling equipment to undertake airborne surveys and other geological and geophysical investigations;
- (vi) unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment;
- (vii) prevention or restriction of access by reason of political unrest, outbreak of hostilities, and inability to obtain consents or approvals (including clearance of work programs pursuant to access agreements entered into with native title claimants);
- (viii) influence of community consultation on the grant or renewal of a mining licence; and
- (ix) uninsured losses and liabilities.

6.2 General risks

(a) Title risk

The renewal of tenements upon expiry of their current term and the granting of applications for exploration licences, exploration permits or mining leases is subject to Ministerial discretion. Non-approval or delay in the approval process could have a negative impact on exploration or mining conducted by the Company, as well as the Share price of the Company.

Various conditions may also be imposed as a condition of renewal. Renewal conditions may include increased expenditure and work commitments or

compulsory relinquishment of part of the tenement areas comprising the Company's projects. The Company makes no assurance that the renewal applications will be granted or applications approved.

(b) **Operating risk**

Potential investors should understand that mineral exploration and development are high-risk undertakings. There can be no assurance that future exploration of the projects, or any other projects that may be acquired in the future, will result in the discovery of an economic resource. Even if an apparently viable resource is identified, there is no guarantee that it can be economically exploited.

Tenements held by the Company are exploration permits only. In the event that the Company, or its subsidiaries, successfully delineates economic deposits on any of the tenements, it will need to apply for a mining lease. There is no guarantee that the Company will be granted a mining lease if one is applied for.

No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of any tenements. Unless and until the Company is able to realise value from the tenements, it is likely to incur ongoing operating losses.

(c) **Options**

The Options will not be quoted on ASX (refer to Section 3.18 for further details). As the Options will not be quoted on ASX there will be no secondary market for the Options. This may adversely affect the Option holder's ability to sell their Options at a desired price, if at all.

(d) **Economic**

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's activities, as well as on its ability to fund those activities.

(e) **Market conditions**

Share market conditions may affect the value of the Company's quoted securities (and Options) regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) conflicts which may affect International trade and supply lines such as the war in Ukraine;
- (ii) general economic outlook;
- (iii) introduction of tax reform or other new legislation;
- (iv) interest rates and inflation rates;
- (v) changes in investor sentiment toward particular market sectors;

- (vi) the demand for, and supply of, capital; and
- (vii) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and healthcare stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(f) **Environmental risks**

The operations and proposed activities of the Company are subject to laws and regulations concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

The minerals and mining industries have become subject to increasing environmental responsibility and liability. The potential for liability is an ever-present risk. The use and disposal of chemicals in the mining industry is under constant legislative scrutiny and regulation. There is a risk that environmental laws and regulations may become more onerous, making the Company's operations more expensive.

Mineral exploration activities have inherent risks and liabilities associated with safety and damage to the environment and the disposal of waste products. The occurrence of any such safety or environmental incident could delay exploration programs. Events, such as unpredictable rainfall or bushfires may impact on the Company's ongoing compliance with environmental legislation, regulations and licences. Significant liabilities could be imposed on the Company for damages, clean-up costs or penalties in the event of certain discharges into the environment, environmental damage caused by previous operations or non-compliance with environmental laws or regulations.

Approvals are required for land clearing and for ground disturbing activities. Delays in obtaining such approvals can result in a delay to anticipated exploration programs.

Exploration work will be carried out in a way that causes minimum impact on the environment. Consistent with this, it may be necessary in some cases to undertake baseline environmental studies prior to certain exploration or mining activities, so that environmental impact can be monitored, and as far as possible, minimised.

(g) **Climate Change**

There are a number of risks related to climate change which may affect the Company, including:

- (i) the changes which may occur to the climate of the area in which the projects are situated are not able to be predicted. The climate may change in a way which, for example, reduces evaporation rates or increases rainfall or the intensity of weather events in the tenement areas. These may cause disruption to field work and exploration activities;
- (ii) changes in governmental policy in response to climate change could adversely impact the value of the Company's assets, its business strategy and/or the costs of its operations; and
- (iii) climate change may have an impact on the operations of participants in the mining industry.

(h) **Litigation risk**

While the Company is not currently engaged in any litigation or disputes, it remains exposed to possible litigation and dispute risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims, trademark infringement and employee claims. Further, the Company may be involved in disputes with other parties in the future, which may result in litigation. Damages claimed under such litigation may be material or may be indeterminate, and the outcome of such litigation may materially impact on the Company's operations, financial performance and financial position. Defence and settlement costs can be significant, even in respect of claims that have no merit, and can divert the time and attention of management away from the business. In addition, the adverse publicity surrounding such claims may have a material adverse effect on the Company's business and prospects.

(i) **Safety risks**

Safety is a fundamental risk for any exploration and development company in regard to personal injury, damage to property and equipment and other losses. The occurrence of any of these risks could result in legal proceedings against the Company and substantial losses to the Company due to injury or loss of life, damage to or destruction of property, regulatory investigation, and penalties or suspension of operations. Damage occurring to third parties as a result of such risks may give rise to claims against the Company. The Company provides appropriate instructions, equipment, preventive measures, first aid information and training to all stakeholders to all occupational, health and safety management systems. The Company has taken an appropriate level of insurance to mitigate this risk.

(j) **Speculative investment**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. 7.1 Litigation

As at the date of this prospectus the Company is not involved in any legal proceedings and the Directors are not aware of any legal proceedings pending or threatened against the Company which are likely to have a material adverse effect on the business or financial position of the Company.

7.2 Continuous disclosure obligations

The Company is a 'disclosing entity' (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company's securities.

This Prospectus is a 'transaction specific prospectus'. In general terms a 'transaction specific prospectus' is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been provided to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to apply for Options.

The Company, as a disclosing entity under the Corporations Act states that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with ASIC in relation to the Company may be obtained from, or inspected at, the offices of ASIC; and

Copies of all documents lodged with ASX in relation to the Company will be made available to anyone who requests a copy for it during the offer period, available by email.
